

INTRODUCTION OF COMPANY

Syarikat Logam Mahaajaya Sdn Bhd has been in service for past 16 years since incorporated in 2005. We have grown from a small metal recycling operation and have expanded to three scrap metal recycling locations in Malaysia, Brunei and India.

Establishments in the scrap metal recycling industry are primarily involved in the collection, processing and recycling of condemned ferrous metals, such as iron and steel, and nonferrous metals, Much as aluminum, copper and nickel.

We service a range of businesses Malaysia wide both large and small. The management and staff at Syarikat Logam Mahaajaya Sdn Bhd are dedicated to the continuous improvement of our business. With the generous support of all our clients our goal is to steadily improve and expand our scope of business. We offer prompt and efficient payment terms.

BUSINESS VALUES AND BELIEFS

- > Commitment And Dedication To Our Customers Will Not Be Compromised.
- > Trust And Respect Between All Team Members Is Essential Toward Meeting Our Goals.
- > Integrity And Respect For All Individuals Are Never Compromised.
- > Allow Customers To Make Decision And Allow Pressure Environment Based Fact.
- > Promote Family Values In All Aspect Of Our Bussiness.
- > Generate Enthusiasm Based On Satisfaction For Customers And Team Members.

OUR CORE VALUE OF SYARIKAT LOGAM MAHAAJAYA SDN BHD

VISION AND MISSION: -

Value our customer with attention, consideration and respect. We are customer focused. That means we continuously improve the quality; look feel and image of your place. Develop the company by providing open communication with our customers and employees.

Save the Green Environment by 3R services: -

REDUCE , RECYCLE , REUSE

Build and maintain the best. Means providing outstanding quality, services, cleanliness and value for our customers

MISSION STATEMENT

OUR MISSION

To provide our employees with a safe and superior working environment; a spirit of team effort and rewarding them with the courtesy and respect they deserve. To create a relationship with our clients by providing them superior services at affordable prices, added value by offering additional services. Quality service to our employee and customers are the building blocks of our business philosophy.

PHILOSOPHY

We believe that building life time relationship with our customers and team members is essential to exceeding our expectations and will resulting the successful accomplishment of our mission.

COMPANY SERVICES & OPERATION

Ferrous Scrap – The Purchase Process

We are ready to serve you irrespective of the volume or diversity of recyclable material.

Industrial scrap - From manufacturers and service centres that generate steel and iron as a by-product of their production processes as well as furnace iron from steel mills and foundries.

Obsolete scrap – From auto wreckers, demolition contractors, railroads, busses and others, including anyone's metallic maintenance scrap, and from smaller scrap yards who generate obsolete steel and iron scrap.

Prices paid for scrap metals, on a delivered basis, are determined primarily by the market demand and the composition, quality, size and weight of the materials

COMPANY SERVICES & OPERATION

Ferrous Scrap – The Sale Process

Scrap generators are vital to the entire process of scrap recycling. We prepare the ferrous scrap purchased for sale to customers for re-melting into new metallic products. Purchased scrap is processed through a variety of methods including sorting, shredding, shearing or cutting, briquette or breaking.

With suitable equipment and employees, our ferrous processing capabilities are considered competent in the industry. We produce number of different sized and shaped products to customer specifications and market demand.

Here is a brief overview of some of the processes we offer to meet the needs of our end users. This will also give you, the scrap generator, an understanding of what happens to the scrap we purchase.

Sorting

After purchasing ferrous scrap metal, we inspect the material to determine how it should be processed. In some cases, scrap may be sorted and sold without further processing. Most scrap, however, is separated for further processing according to its form, size and composition by using conveyor systems, front-end loaders, crane-mounted electromagnets or claw-like grapples

Shredding

Obsolete scrap, such as automobiles, home appliances and other consumer goods, as well as certain light gauge industrial scrap, is typically is processed in our shredding operations. These items are fed into massive shredders that quickly break the bulky, mixed quality scrap into small fist-sized pieces, or fragments. The shredding production process uses magnets and other equipment to separate ferrous fragments from non-ferrous and non-metallic materials

COMPANY SERVICES & OPERATION

Non-Ferrous Scrap - The Purchase Process

Non-ferrous scrap is purchased from several primary sources:

Industrial scrap – from manufacturers, service centres and other non-ferrous scrap sources who generate new metal scrap as a by-product of their production processes, such as scrap aluminium, copper, stainless steel, brass, high temperature alloys and other metals.

Obsolete scrap – from telecommunications, aerospace, defence, demolition and recycling companies that generate obsolete scrap consisting primarily of copper wire and exotic metal alloys, and smaller scrap dealers and peddlers who deliver their scrap directly to our facilities.

Prices paid for scrap metals, on a delivered basis, are determined primarily by market demand and the composition, quality, size and weight of the materials.

Once received, the materials are sorted, graded, properly prepared and packaged for sale. Syarikat Logam Mahaajaya Sdn. Bhd. sells its non-ferrous scrap products to end-users, such consumers as refineries smelter, specialty steel makers, foundries and specialty ingot makers throughout the Malaysia. Prices for some non-ferrous scrap metals change daily based on the London Metals Exchange spot and future prices.

Coppers, brass, aluminium, zinc, die cast, stainless steel, titanium and high-temperature alloys are among the significant non-ferrous metals we buy, process and sell.

Non-Ferrous Scrap - The Sale Process

Scrap generators are vital to the entire process of scrap recycling. We prepare the non-ferrous scrap metal we purchase from you for resale to our customers for re-melting into new metallic products. Your scrap is processed through a variety of methods including sorting, shredding, shearing or cutting, briquetting chopping with suitable equipment and employees, our non-ferrous metal processing capabilities are considered competent in the industry. We produce number of different sized and shaped products to each customer's specifications and market demand.

After purchasing non-ferrous scrap metal, the material is inspected to determine how it should be processed to maximize its value. In some cases, scrap may be sorted and sold without further processing to consumers for re-melting. Most metal scrap, however, is separated for further processing according to its form, size and composition. The company's sorting operations separate different types of non-ferrous metal scrap, out to mixed loads of material received, by using conveyor systems, magnets, sorting tables and/or eddy current separation systems.

BENEFITS OF RECYCLING

A steel mill using scrap iron and steel in place of virgin iron ore to make a new product gives the public outstanding value. The new product is comparable in performance to a similar product made from virgin iron ore and its manufacturing process offers fewer risks to the environment.

Recycling conserves ever-diminishing landfill space and the surface biodiversity destroyed in mining of new raw materials from the ground. It closes the resources loop ensuring valuable resources are not lost but are put to back into goods use. The metals made from these "secondary resources" then make much less impact in the remanufacturing process the second time around. Recycling is a true example of a sustainable industry – a concept fundamental to our society's drive to reduce its environmental impact on the planet.

Recycling Creates Jobs

ORGANIZATION CHART

OUR SERVICES

Pricing based on LME (London Metal Exchange) and Current Market Place.

Provide machinery and equipment to smoothen the operation process.

Provide manpower to assist in segregation and clearing of scrap.

Provide container, drums, bins and jumbo bags for scrap collection.

Assist in handling with custom clearances.

Updating of market pricing to customers.

Provide weighing machine upon request.

Collecting at customer's premises.

Transportation to lead and dispose scrap materials.

Housekeeping and maintenance of customers scrap yard.

Payment by Cheque / cash
